

Rizwan Mohammed

Software Engineer

Illinois | (312) 912-9454 | rizvaansmo@gmail.com | linkedin.com/in/rizwanmo | github.com/techplot26

Summary

3 years Software Engineering across Full stack and backend. Developed scalable and secure applications using C#, .NET and Java technologies. Experienced in designing and developing RESTful APIs with a strong focus on clean architecture, performance optimization, and maintainability with relational and non-relational databases. Along with 3+ years of experience in Data Analytics, leveraging SQL, POWERBI, Tableau, Python, and data visualization techniques to transform complex datasets into actionable business insights and support data-driven decision-making.

Technical Skills

Languages: Java, C#, Python, SQL, JavaScript

Frontend: React.js, HTML, CSS

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, .NET, ASP.NET Core, Node.js, Express.js, RESTful APIs

Databases: MySQL, Oracle Database, PL/SQL, MongoDB, SQL Server, Snowflake

Cloud & DevOps: AWS, Docker, Git, GitHub

Tools: Maven, IntelliJ IDEA, Postman, Jira

Software Design: UML, Figma, Agile Methodologies

Experience

Software Engineer

Sep 2023 until present

Freelancer

- Designed and developed RESTful APIs using C# and .NET
- Built scalable backend services following clean architecture principles
- Containerized applications using Docker for consistent deployment
- Deployed and maintained applications on AWS
- Designed and optimized database schemas in SQL Server and MySQL
- Collaborated with cross-functional teams in Agile environments

Data Analyst

Feb 2022- Jul 2022

Key data INC

Project: Affinity XAP Data migration

Migrating data from on premise data sources into Snowflake database, looking after the documentation and maintaining the existing process of Talend ETL jobs.

Environment: Snowflake, Tableau, Talend data integration, AWS

- Investigated Job failures and fix the issues.
- Constructed a SFTP job that sources data from a SFTP server loads the data into database.
- Communicated with the client to understand needs and requests to build 20 plus data pipelines for analyzing technical issues.
- Performed Tableau server admin duties like new user creation, role updating etc., performed sysadmin roles on snowflake to undertake tasks such as Full access to manage the Snowflake environment, including creating and managing databases, schemas, tables, warehouses, and

- other objects.
- Made Zero-Copy Cloning feature of snowflake to create historical snapshots for data analysis, creating data backup and for testing purposes.
- Made use of Talend transformations, to extract data from RESTAPI's and loaded target data in snowflake tables.
- Data issue investigation on API, snowflake tables and providing analysis as when requested.
- Ad hoc data analysis request on creation of report using tableau.

Data Analyst

Jul 2021 till Feb 2022

Freelancer

Project: Creation of Dashboard and new set of reports using Power BI visualization tool.

Environment: Power BI, SQL Server

- Requirement gathering from clients.
- Create test cases and test the code.
- Created dynamic reports, dashboards using power bi.
- Implemented Row-Level Security (RLS) on sensitive customer data to ensure compliance with privacy policies while providing tailored access for different user groups.
- Developed data Model by defining relationships between tables, creating calculated columns and measures using DAX to enhance data analysis and reporting capabilities.

Junior Business intelligence Developer

Mar 2021 till Jul2021

Michael Hill Jeweler

Project: Power Bi Governance for Michael Hill

- Enhancement of existing reports and dashboards using power BI.
- Environment: SQL server, Power BI, DEVOPS, Git
- Involved in technical design discussion and sprint planning.
- Used Octopus tool, to take regular database backups, deployment of database from lower to higher environments.
- Performed Ad hoc request of power bi report creation and enhancements.
- Involved in Decommissioning of power bi reports after performing usage metrics analysis.
- Enhancement of existing reports and dashboards using power bi.
- Orchestrate critical jobs using OCTOPUS tool.
- Investigating and fixing any job failures.
- Liaise and coordinate with stakeholders and senior developers in preparing the release document version.
- State of health checks, report the performance on key databases, and present to data Architect.

Data officer

Sep 2020-Dec 2020

Recruitment Central

Project: QRIDA

Data modeling of datasets using Power BI.

Environment: SQL server, Power BI

- Requirement gathering
- Created a data model using power Bi tool.
- Liaise with senior data analyst and documented on new tables and expression.
- Developed reports and dashboards using power bi.

Virtual database Administrator

Mar 2019- Jul 2019

Wardy IT Solutions

Provided Level 1 database support related tasks using SQL server technologies.

Environment: SQL server

- Provided Level 1 Support to our client Databases infrastructure across Australia and provide technical support.
- Demonstrated diagnosing skills for any issues related to job failures and disk full, blockings, creating logins, database access for users and other technical issues etc.
- Monitoring critical SQL agent jobs perform database backups (full, diff & TLOG) and investigate and schedule job on failure.
- Perform Health checks on SQL databases and report the performance to clients.

IT Consultant

May 2018- Aug 2018

Mark Gury & Associates

Project: OCT DRS Migration for Mark Gurry & Associates

Migrated On premise database and other business application to SQL server.

Environment: SQL Server, Power BI, SSRS, Power Query, DAX,

- Requirement gathering from business stakeholders.
- Responsible for developing reports, dashboards data sets using Power Bi.
- Prepared SSRS reports, dashboards according to business requirements.
- Migrated the developed code from dev to production.

I.T Analyst

Aug 2011 - Feb 2015

Tata Consultancy Private Limited

Project: Legacy Data warehouse Reporting Solution for CMEC

Prepared new set of reports using SQL server reporting services.

Environment: SSRS, SSIS, SSAS

- Developed reports using SSRS, SSAS and prepared dashboard and tested, and deployed.
- Analyzed and designed the technical specifications for the requirements provided by the client.
- Diagnosed any performance related issues and resolved them.

Project: Global HR Staffing Reporting and change request for Bank of America (USA)

Enhancement of reports and dashboards and data modeling of datasets using SQL server reporting services.

Environment: SSRS, SSIS, SSAS

- Designed the data model and prepared dashboards and reports as per design documents.
- Enhancement on BAU reports such as cascading parameters, charts and scheduling of reports, documented the code.
- Scheduled and monitored important jobs.
- Created new users for reports and dashboard.

Education

Bachelor of Commerce, Osmania University

Master of Information Technology (Computer Science) Queensland University of Technology

2026-2028

Certification

Certificate III in Information & Digital Media Technology, Tafe Queensland

Querying TSQL database, Microsoft certification (70-461)
